Re: *Freedom of Information Act Request Pursuant to 5 U.S.C. § 552*

Dear Sir/Madam

I write to request the authentication of certain Environmental Protection Agency (EPA) documents under the Freedom of Information Act (FOIA), 5 U.S.C. § 552. The documents for which I am seeking authentication are uploaded to the FOIA portal online and associated identifying information for each document is detailed below, to the extent available.

To facilitate this process, I have also attached a model attestation form, which can be used for the purpose of document authentication. The form contains the necessary language for an authorized EPA representative to certify the accuracy, completeness, and authenticity of the documents.

It would be greatly appreciated if an authorized EPA representative could fill out and sign the attached Certificate of Authentication form, certifying that the attached documents are true, accurate, and complete copies of the documents as they appear in the records of the EPA. This authentication should be done by someone with legal custody of the record or someone authorized to attest to the accuracy of such documents.

Please note that the use of the attached model attestation form is a suggestion for your convenience. If the EPA has an established procedure for document authentication that differs from the provided form, please feel free to proceed as you deem most appropriate, as long as the authentication fulfills the requirement of verifying the document as a true and correct copy of the document as it appears in the records of the EPA, and it is signed by an authorized EPA representative.

For your convenience, I've included identifying information for each submitted document below. Most of these documents are primarily webpages that have since been updated on the EPA's website after our last access. We've attached the versions of these webpages as they appeared when we accessed them. These versions include the date of the last update that took place before our access, which is mentioned below wherever available. It's important to note that the online version of these webpages may show a more recent update. However, the versions we are providing are representative of the state of the webpages at the time we accessed them, not their current online state.
